Dear Dr. Peebles,

I do hope this note finds you in good health.

Since I last wrote you, I have been in contact with Mr. Travis P. King. I was able to tell him about his Uncle Otis. He told me of the article to appear in the National Geographic concerning the Peebles plantation! Looking forward to it!

Has anyone ever gotten Joseph Lockhart (1786/1829) or James Marshall (1750/1812) back any further? These two lines really interest me. I have corresponded with several different members of these lines -- no help. We just returned from S.C. I was in hopes to have enough time to look into James Marshall and see if land transactions might mention his first wife the mother of Elizabeth. Just not enough time.

We live between two houses. I wanted to get this off to you today so that you might mail a copy of the Peebles Book to my cousin. My address book -- is in town. Please find enclosed my check in the amount of \$22.00. Please mail to the address below.

We are considering a trip to Scotland this summer. I would love to go to Peebles Scotland!

Take care.

Sincerely,

Betty Sprungsted
